

CAST ABOVE THE REST

“We called Astech to cast a set of work-rolls for our shot-blast machine. The rolls showed good wear-resistance, did not crack or break, and lasted longer than expected. That is why our casting source is **ASTECH**.”

—Charlie Frampton, Lane Enterprises, Inc.

Prototype & production steel and chrome iron castings for heat, wear and corrosion resistant applications.

- Low and High Carbon Alloys
- Stainless Steel
- Manganese Steel
- Ni-hard Chrome Irons
